When Visiting Parks:

- For your safety, remain on trails to avoid ticks and poison ivy.
- Help keep wildlife healthy - do not feed wild animals.
- Leave only your footprints - take only your memories.

Registration:

Field Trip Reservations The following programs are available to help teachers meet the New York State Curriculum Standards for science. The emphasis will be a hands-on approach to learning. Children will practice problem solving skills, develop a positive attitude toward science, and increase their scientific literacy. Content and duration of educational programs can be adapted to meet your needs.

Cancellations If you are unable to keep your reservation, please call and cancel so others may have the opportunity to attend. Failure to do so may result in loss of reservations for future programs.

Fees \$4.00 per person. Fees apply to all students and chaperones. There is no charge for teachers. Parking fees may apply.

Mailing List If you would like to receive our public quarterly environmental education brochure, please call (631) 581-1072 or text “osprey” to 42828 to receive it electronically.

Winter Bird Exploration

Available November-March

Your class will identify the wide variety of waterfowl and birds that visit the Park’s waterways during the winter months. We’ll set up spotting scopes and survey the birds’ feeding areas to observe our feathered friends. Using costumes, survival adaptations are explored.

Wet & Wild

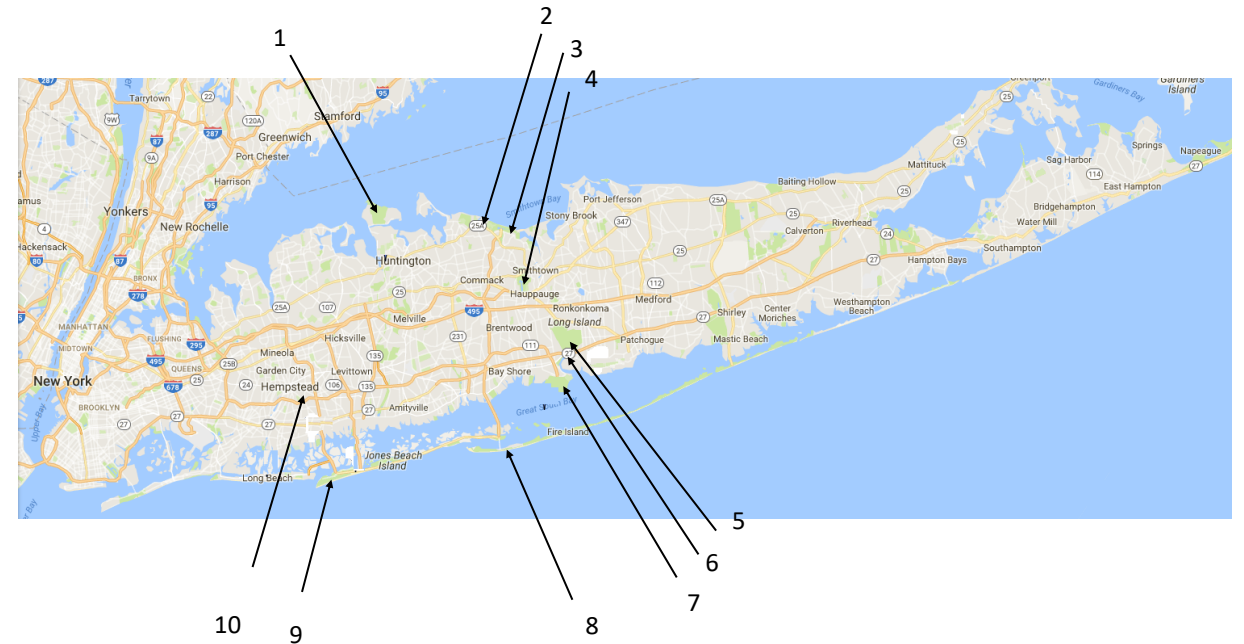

Available April-October

Students will discover the underwater world of ponds through hands-on sampling and field observations. Water chemistry and testing can be added for higher grades. After visiting the pond, the class will go indoors to look at microscopic organisms and discuss their role in the food chain (attendance limit).

Seasonal Nature Walks

Available All Seasons

You and your class will enjoy a leisurely walk through the woodland trails to discover the changes taking place throughout the year.

Fall: Study leaf changes, and discuss the different ways plants and animals prepare for winter.

Winter: What are mammals and birds doing at this time of year? Where can they be found?

Spring: As the days grow, see animals and birds returning to their favorite State parks!

Summer: Discover the diversity of trees on Long Island while exploring the forest.

Sound/Bay Studies

Available All Seasons

Students learn about the water cycle and gain an awareness for conserving and protecting our natural resources. They discover the different ways people use and influence the Long Island Sound and the Great South Bay. The importance of clean water and other related issues, such as pollution, can also be addressed.

EDUCATION PROGRAMS

Programs may be adapted to your needs:

If a new subject matter or concept is not listed below

Or you with a task to be included

Or even a different subject or park

We can tailor the programs. Just let us know!

Butterflies and Moths

Available April-October

Students will unlock the secrets of the life cycle of these insects, discover the amazing ways that they ward off enemies and how they survive the winter. There will be an indoor presentation with some surprises followed by a short hike to allow students to observe these insects in the wild.

Creature Creations

Available All Seasons

Learn how the physical features of a species are shaped by its environment during a discussion of animal adaptations (high school classes will discuss natural selection and survival of the fittest). Using simple materials, in small groups, students will be challenged to create a brand new bird species that must fit a particular habitat and diet.

Geology Rocks

Available All Seasons

Students will be introduced to the basics of geology using a variety of hands-on activities and simple experiments. They will explore the properties of rocks, including density, conductivity, and magnetism. We will wrap up with an eye-opening discussion on the practical uses for rocks and minerals in our daily life.

Long Island Sound Saunter

Available April-October

The perfect program for a view of the sound! With a Park Naturalist as your guide, you will explore the geology and ecology of the Long Island Sound along your hike. The bus can drop you off at either Nissequogue River or Sunken Meadow State Park and hike from one park to the other, approximately 3 miles . Bring lunch and enjoy a picnic at the Park where the bus will pick you up or make it a round trip.
