C. Environmental Resources Survey

Consultation with NPS regarding the NEPA pathway for a proposal should occur prior to the completion of this section. If you have already determined that the proposal will require an EA or EIS, you may go directly to the questions following Tables 1 and 2.

The tables below serve as a record of the environmental resources present at the site, whether the proposed action is likely to have a significantly negative impact those resources, and whether further information is needed to determine the potential impact. Review the listed resources and identify any resources that may be significantly impacted by the action. The Environmental Resources Survey should be completed with professional input from resource experts and in consultation with relevant local, state, tribal, and federal governments, as appropriate.

Table 1 – For each resource indicate if positive impacts or negative impacts are anticipated to result from the action or if further information is needed to determine the potential impact. If the resource is not present, skip the question.

- + indicates positive impacts are anticipated to result from the action
- indicates negative impacts are anticipated to result from the action
- ? indicates further information is needed to determine the potential impact
