Recreational Resource Protection and Enhancement

**Bathhouse**
- Design the bathhouse as an events venue with facilities for caterers, ADA accessible restrooms, upgraded utilities, and a large sundeck that can accommodate up to 300 persons.

**Bandshell**
- Upgrade existing bandshell; rehabilitate structure, upgrade area, and remove pavement to provide disaster performance space with visual acoustics from parking lot.

**Parking**
- Develop and construct a new-day use area parking lot that incorporates green infrastructure elements.
- Expand the golf clubhouse parking to accommodate wheelchair accessible vehicles, including overflow.

**Picnic Shelters**
- Make improvements to picnic shelters; improve path from shelters to day-use area.
- Upgrade comfort stations and upgrade utilities.

**Recreation Amenities**
- Create a multi-purpose court at the former roller rink (e.g., basketball, lacrosse wall, street hockey).
- Develop and implement traffic calming measures at the Freedom Road Property, in order to accommodate.
- Add a walking route with exercise stations in the existing softball area.
- Complete a walking trail system at the Freedom Road Property and provide connections with existing trails.

**Golf Course**
- Improve golf course facility and upgrade existing facilities.
- Develop a transport facility for patrons up to the golf course park shops.

Natural and Cultural Resources Protection

**Rare/Endangered Species**
- Support and improve habitat management for Turtle of Conservation Concern (e.g., Blending’s turtle, Eastern Box Turtle Special Concern).

**Habitat Enhancement**
- Implement and expand natural resource protections for key species/habitats.
- Complete opportunities for improved species habitat, or wetland creation and expansion.
- Complete a series of between the golf course and day-use area to create pollinator habitat and functional vegetation.
- Develop onvasive species management program to establish a more proactive approach.
- Implement habitat enhancement opportunities (e.g., grassland management, bird habitat on former agricultural lands).

**Cultural Resources**
- Complete an archaeological survey of the Freedom Road Property.
- Complete a cultural resources survey to evaluate the potential archaeological activities in the park’s golf course.
- Develop an interpretation program that tells the story of the park’s established and the significance of the design.
- Develop an annotated bibliography with original design documents for historical elements and parks.

Operations, Infrastructure and Facilities

**Circulation System**
- Complete an assessment of traffic calming measures at the park.
- Develop a comprehensive park, pedestrian, and bike plan, with signage, wayfinding, traffic trails and zoned parking.
- Improve accessibility to park and park entrance with a parks cle ansignage, plantings, and archaeological experience.

**Management and Operations**
- Develop a plan for management, operations and related resource protections at the park.
- Create a staffing plan that addresses current and proposed activity at the park.
- Build a new park management house at the Freedom Road property.
- Implement a more efficient and functional maintenance area.
- Complete climate and weather information on park amenities, activities and resources, housing capacity, and facilities.

**Utilities**
- Upgrade utility systems to provide reliable service and accommodate new and expanded development.

**Education and Programming**
- Develop new visitor activity programs (e.g., introduction to activities – e.g., Putt, disc golf, bandshell, etc).
- Enhance environmental education and outreach, including programs, partnerships, and encourage people to visit the park.
- Develop an interpretive program that tells the story of the establishment of the park and the design.
- Develop plans, programs, and booklets, and offer opportunities for self-guided nature walks, programs, and other programs for self-guided educational content.
- Implement a site management program that facilitates amenities, resources, and capacity of facilities for self-guiding visitors.
