Once completed, the Quaker area multi-use trail will offer over five miles of accessible paths winding through woodlands and fields along ASP Route 3 and Quaker Lake, including several scenic crossings over Quaker Run.

New York State Office of Parks, Recreation & Historic Preservation is excited to announce construction of a new multi-use trail in the Quaker Run Area of Allegany State Park.

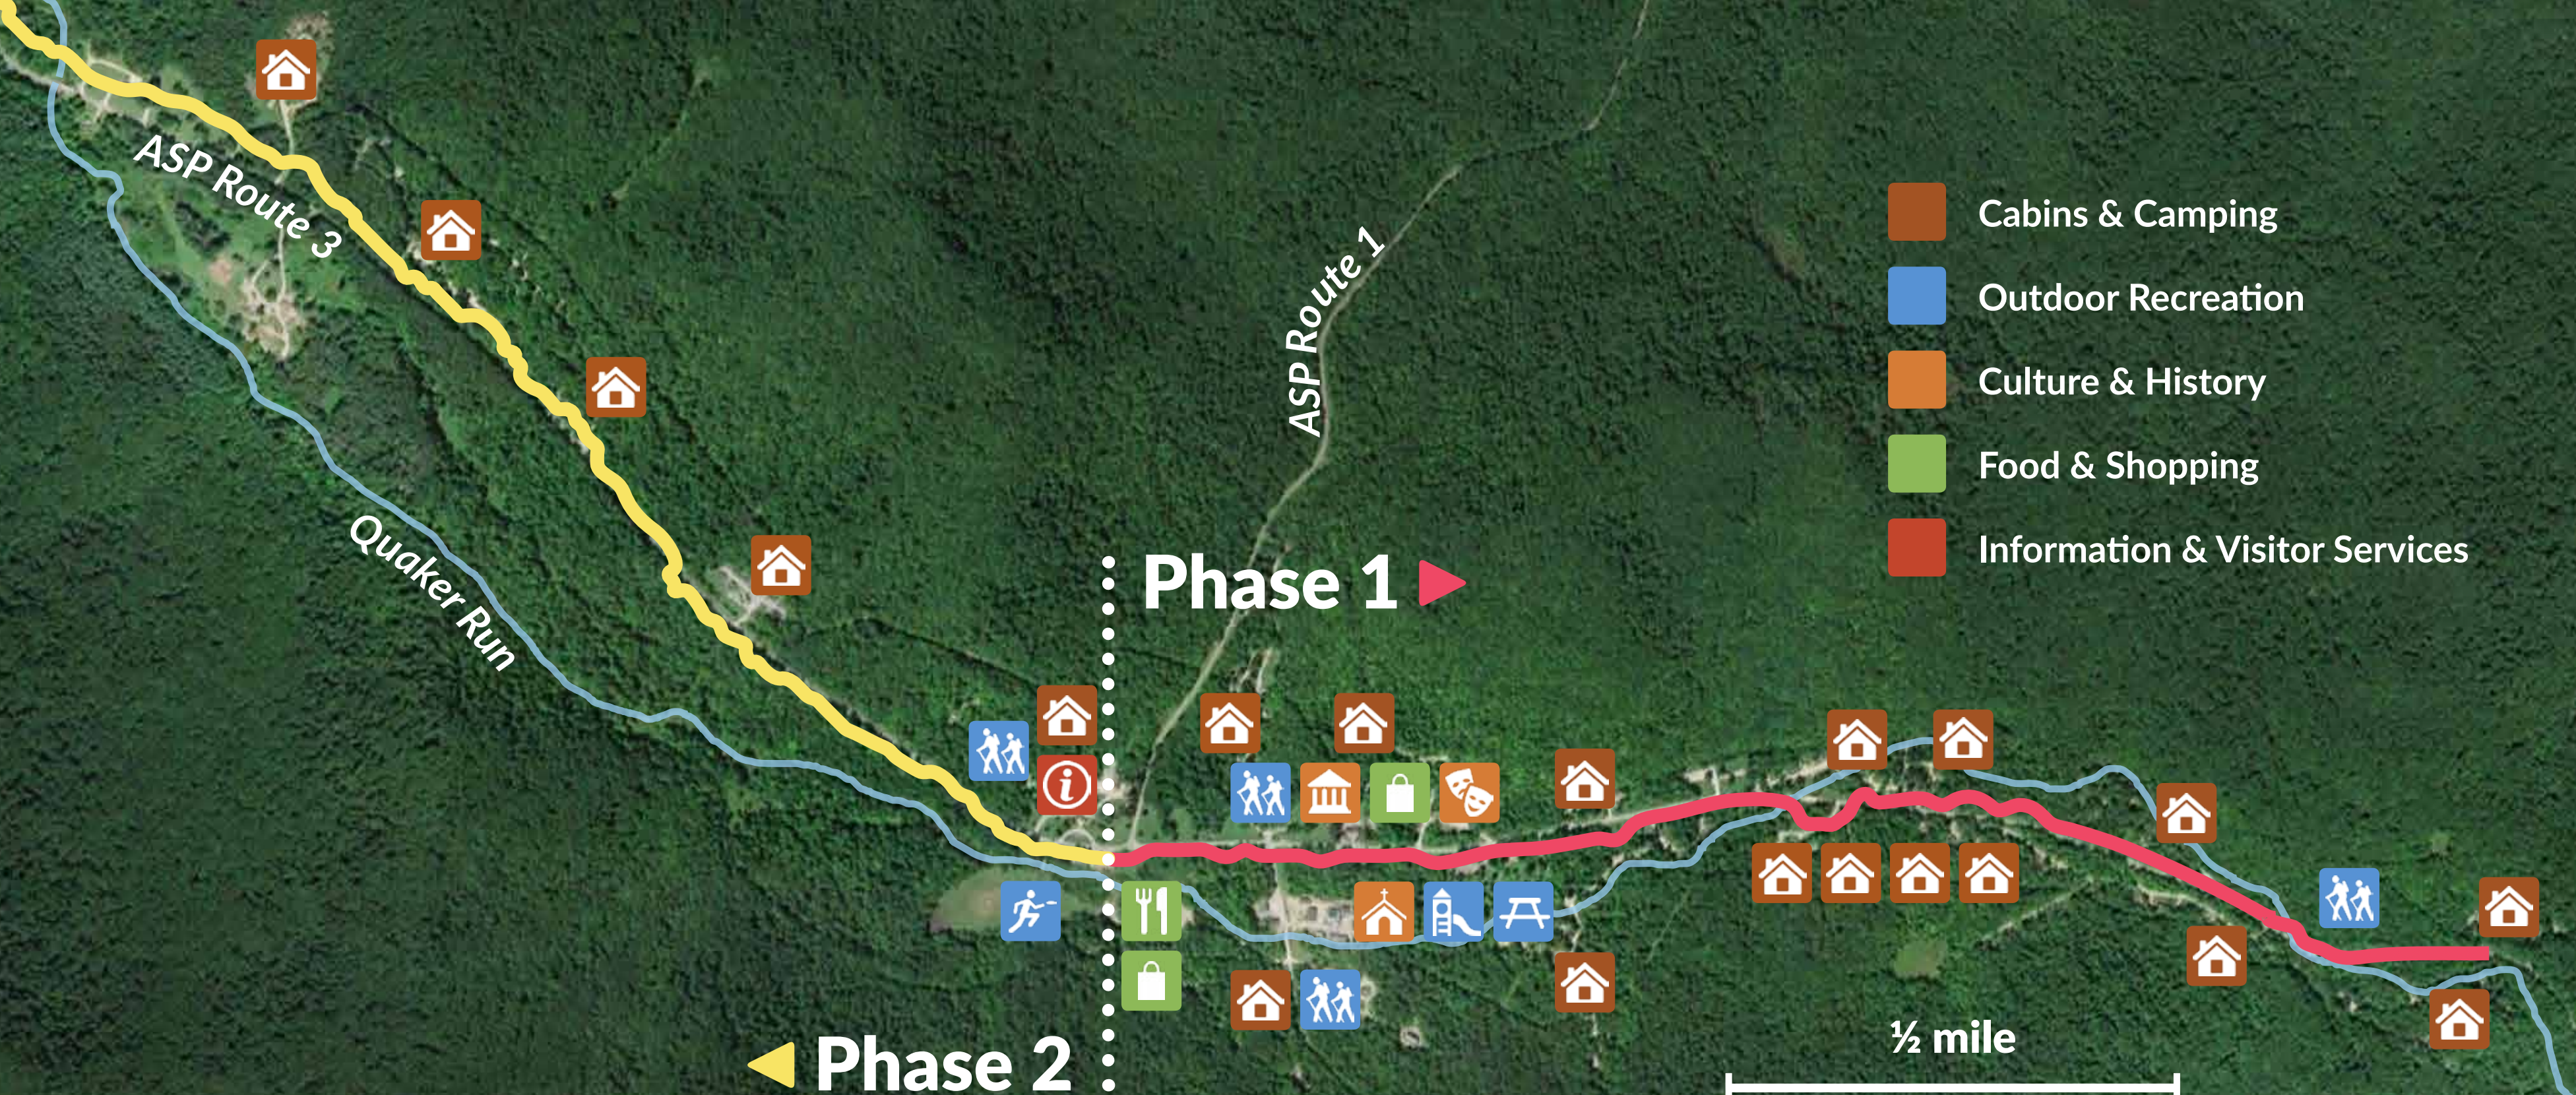

This key transportation and recreation project will provide a safe and enjoyable means for our many visitors to bicycle or hike around the Quaker Run Area.

Phase 1 construction has begun and will continue through summer 2020. Please be aware that construction activity will take place in areas along the trail route from Taft Cabin to the Quaker General Store. Project updates will be provided on our

Allegany State Park Facebook page as the project progresses.

Preliminary design and surveying is currently underway for Phase 2 of the trail, which will ultimately run from the Quaker General Store to Quaker Lake Beach.

We thank you for your patience while these important safety and recreational improvements are made.
