The Friends in FORCES
Tom Hughes, NRS Biologist
Central Region FORCES Program Manager

As I flip through the pages of our newsletter, I am always excited to see photos of our FORCES students. I feel lucky to witness the formation and strengthening of so many friendships as our stewards, ambassadors and club members share common experiences with the environment, projects and other activities within our State Parks. Through my observations over the last nine years, I can tell you that these friendships are meaningful and long lasting.

Our college years can be among the most stressful times of our entire lives—struggling to get good grades, dealing with financial woes and desperately trying to maintain a healthy social life. While FORCES may not unfortunately alleviate the financial burdens of most, I know our program significantly enhances the academic and personal experiences of so many of our participants.

Nowhere is this more evident than at our annual student events—FORCES Summit (Page 1), Trainapalooza (Page 14), and the Fall Gathering, this year on October 1st (Page 11). I am proud to have been present at all of them! These events capture and showcase the enthusiasm, talents and successes of our FORCES staff and students. In addition, we get to gather at some of the most amazing State Parks and academic campuses. For example, Le Moyne College, Hartwick College and Wells College have all hosted the FORCES Summit, and we have plans to visit many more campuses in the future. We are grateful for the strong relationships that we have with our academic partners and State Parks’ community that make this all possible.

On a more personal note, I am grateful for all the friendships and professional relationships I have gained as a direct result of the FORCES program. I have enjoyed mentoring and guiding students as they embark on their professional journeys. In addition, I am happy to see so many of our former FORCES students now working as NYS employees within our agency. I hope that these opportunities will continue to expand in the coming years.

“Truly great friends are hard to find, difficult to leave, and impossible to forget.” - Unknown
Central Region Update
Amy Kochem, FORCES Program Coordinator

Our SUNY ESF Federal Work Study partnership continued to remain strong with 6 work study stewards on board for the spring semester. Additionally, 7 stewards worked on projects that included native seed collection and propagation planning, aquatic education planning and implementation at the YARE (Youth Aquatic Resource Education) Workshop held in April at the Onondaga Lake Visitor’s Center, environmental education programs, Chittenango ovate amber snail (COAS) lab work at ESF, and American hart’s-tongue fern mapping at Clark Reservation. FORCES sustained its strong presence at the Women in Nature (WIN) 11th Annual Workshop held in April.

Tom Hughes teamed up with Mat Webber, educator from the Izaak Walton League of America (IWLA), to provide water quality instruction to members of the Student Conservation Association (SCA) and New York State’s Excelsior Conservation Corps (ECC). Using IWLA’ Creek Freaks water-based curriculum, participants learned about water quality assessment, sampled for macroinvertebrates in the stream, and participated in hands-on aquatic activities.

For the second consecutive spring, stewards participated in Canada goose egg oiling at Chenango Valley State Park. While Canada geese are one of the most readily recognized birds and enjoyed by many, they can have significant negative impacts on property, agriculture, public safety, and disease threats. Using food-grade corn oil, the eggs are coated and placed back into the nest. The oil blocks the pores in the eggs’ shell, and prevents further development. Though the high water posed a bit of a challenge and may have hindered pairs from building nests at the typical time in the season, four nests were located and oiled.

Finger Lakes Region Update
Josh Teeter, FL Region FORCES Program Manager

We had two FORCES Stewards for the spring semester. Laura Young joined us as an Education and Outreach Steward from Ithaca College (B.S. in Outdoor Adventure Leadership), and Caitlin Niederhofer as a Conservation Steward from SUNY Cortland (B.S. Conservation Biology). Caitlin and Laura used their FORCES Stewardships as internships for their respective degrees, receiving course credits for their work.

Laura contributed 492 hours to various projects with FORCES. These projects focused on creating digital content, including 14 brochures for the majority of the parks in the Finger Lakes Region. These e-brochures will help offset the OPRHP need for paper products. Laura also worked on interpretative signs for Sampson, Buttermilk Falls, and Fillmore Glen State Parks. She both updated and created new content for these signs.

Caitlin Niederhofer measuring the diameter at breast height (DBH) of an eastern hemlock. Photo credit: OPRHP

Caitlin conducted post-treatment surveys for eastern hemlock trees that had been treated for the invasive insect, Hemlock Woolly Adelgid (HWA). Caitlin also co-wrote a grant for invasive species control and pollinator meadow creation, and worked on finalizing Emerald Ash Borer management plans. Caitlin now works for the OPRHP as a Landscape Restoration Specialist for the Finger Lakes Region.

Coordinator’s Corner
Amy Kochem, FORCES Program Coordinator

After reading through each newsletter edition, I am always amazed at the diversity of FORCES projects that stewards get involved with, and this spring season followed suit. Stewards worked on projects that included planning and conducting interpretive programs, assisting staff in creating and writing the FORCES Strategic and Operational Plans, working in the lab at ESF with the Chittenango Ovate Amber Snail population, GIS mapping of invasive species populations, native seed database creating, and co-writing the NYS Regional Envirothon aquatics test, just to list a few. It is a very satisfying feeling knowing that our stewards are gaining valuable real-world, hands-on experiences in our parks.

FORCES offers a myriad of opportunities to students hungry for experiences in their academic field, to those seeking credit for an internship, capstone or thesis project, to those looking to build their resumes, and to those who just want to spend more time working on a project that they feel passionate about. With our recent expansion to the Taconic, Niagara, and Allegany Regions, the possibilities for steward projects broadens immensely, providing a unique array of project ideas.

“I loved being a part of everything including invasive species management, interpretation, trail work, biological control, grant work, and native plant workshops.” - Caitlin Nierderhofer

Spring has been a breath of fresh air with the return of FORCES in the Niagara Region. From attending career fairs, Earth Day events, and the annual FORCES Leadership Summit, our connections and the word that were here are spreading like wildfire.

Over the spring we had one steward, Jeffrey Simoneit, who worked vigorously on multiple projects, as well as interpretive programs with our interpretive staff. Jeffrey’s star project was the continuation of a terrestrial invasive species book started by another intern from the fall semester. This book serves as a great tool for educating not only the public on the various types of invasive species but also our incoming summer stewards who don’t have a strong background on the topic.

This summer season is filled with many projects that our Native Seed Steward and Invasive Species Management Steward are going to assist on, including water quality at Woodlawn Beach State Park and installation of pollinator gardens at Evangola State Park and Beaver Island State Park.

“I feel prepared and exponentially more qualified for a parks job... the knowledge I gained has educated my decisions in choosing a career path by revealing opportunities I hadn’t thought of.” – Chloe Miller
Hi, I’m Emma Kubinski and I have been involved in FORCES for about three years now. I cannot say enough about how great FORCES is and how many wonderful opportunities it has created for me.

I became involved in the summer of 2014 when the conservation team at Ganondagan State Historic Site hosted a camp for young people interested in the environmental field. I loved everything I was exposed to at the camp and decided to follow up and asked to intern there.

For the remainder of the summer I volunteered and then continued to intern there throughout my junior and senior year of high school. Despite only being a high school intern, the conservation team at Ganondagan kept me involved in all aspects of their work. They always went the extra mile to help me gain both knowledge and experience. With their help, I was able to narrow down my passions within the environmental field.

Then to my delight they offered me a paid position last summer. I spent the summer mapping invasive plant species on site and assisting in removals and other work. This past fall I started my Freshman year at ESF, and my involvement with FORCES also assisted me at school. The experiences helped me academically and I am now involved with the FORCES club on campus.

FORCES has also opened doors for assisting with research both during the school year and this summer. In addition, I returned to Ganondagan again as a Grassland Conservation Steward where we are continuing working to restore a native grassland. I absolutely love working there and continue to learn every day.

I am so grateful to be a part of FORCES and all that it has to offer. I am constantly preaching to people about how amazing the program is and how impactful it has been for me. The people with FORCES are passionate and committed to helping those involved with the program.

FORCES has provided incredible experiences and great connections that in-turn create potential for future opportunities. The people I have come across through FORCES and Ganondagan continue to inspire me and I can never thank them enough for all they have done for me and many others. Thank you FORCES!!

For more information about 2017 FORCES Stewards see the Who’s Who publication on our website in January 2018.

“I learned valuable skills about how to manage a project in a government department.”
-Amanda Klaben
Hartwick FORCES has held many events this spring, including a rock climbing event at Pine Lake, invasive species removal at Robert V. Riddell State Park, a hike at Taughannock Falls, and a volunteer earth day event! Despite the late start due to weather conditions, our FORCES club continued to plan events and get more students involved. The club will have new e-board members for next year including Elizabeth Karson as president, Rebecca Nathan as Vice president, Hunter McRee as Secretary, and Gabrielle Urban as Treasurer. For next year, we have events planned at Robert V. Riddell, Glimmerglass, and Gilbert Lake State Parks. There will also be more on-campus events. We look forward to working with more students and doing more volunteer work with the community and the local State Parks.

Le Moyne College
Erica Mackey, Club President

We began the spring semester by participating in our school’s annual spring club fair. We enjoyed recruiting people to join FORCES! We also did eco-friendly Friday’s twice a month outside of our cafeteria where we passed out eco-friendly facts and people could decorate a canvas bag to help promote sustainability. We had planned to do a spring camping trip, but unfortunately the weather did not cooperate. In April, we were busy with participating in the Syracuse satellite March for Science and volunteering at Women in Nature. Members enjoyed participating in the March for Science and doing fun activities at Women in Nature. Also in April, we did Earth Jam on our campus where people could make succulent and air plant terrariums. We had people make over eighty terrariums! We also planted flower seeds in flower pots for our community service event to donate to Tiny Homes for Good. Everyone had a lot of fun planting seeds! In the fall we are looking to growing our membership, doing more on campus events, and participating in more events at state parks!

“I’m very happy/excited to continue being a part of this club and making a difference!”
- Kaylee Townsend
SUNY ESF
Samantha Hollister, Club President

We spent a beautiful February morning at Green Lakes State Park in February doing a Hemlock Woolly Adelgid survey (don't worry, we didn't find any). In April we selected new officers for next year, and attended the annual FORCES summit at Wells College. The following week, we designed Earth Day activities for Pine Grove Middle School students that included a science experiment, a bird walk, and a pledge poster.

On April 22nd, ESF FORCES proudly represented our club at the Syracuse Science March, with signs we made at one of our meetings. We wrapped up the semester by volunteering at the 11th annual Wildlife Festival at the Montezuma Audubon Center. Overall, it's been a great year. Our new officers are in place to take over in the Fall, and I know they will do an incredible job!

Wells College
Shania Dauphinais, Club President

In the spring we did several HWA surveys. One of them was at Wells College working with Cornell Cooperative Extension. The other two were with Cayuga Lake Watershed Network at Long Point and Great Gully. We went to Fillmore Glen and helped to remove pine needles from the park area. Lastly, we went to Robert H. Treman for I Love My Park Day. We helped to remove garlic mustard, plant trees and helped to remove excess dirt and rocks after planting trees.

We spent a beautiful February morning at Green Lakes State Park in February doing a Hemlock Woolly Adelgid survey (don't worry, we didn't find any). In April we selected new officers for next year, and attended the annual FORCES summit at Wells College. FORCES Programs
Amy Kochem, FORCES Program Coordinator

Wells College hosted our 3rd Annual FORCES Leadership Summit on April 9, 2017. As is typical of our gatherings, a diversity of colleges was represented with 25 stewards from 9 different academic institutions. We were treated with an informative presentation from Carrie Brown-Lima of the NYS Invasive Species Research Institute. Kyle Webster, Supervising Conservation Steward at Ganondagan State Historic Site, delivered an instructional presentation on native seed collecting and Tom Hughes provided a comprehensive discussion on the scope of the FORCES Program.

FORCES Member Awards

Service Awards: Lukas Evans, Caitlin Hawley
Club of the Year: SUNY Geneseo FORCES

Ryan Colling, our former Club President, led a survival workshop. Topics included gear that one should have in the back country, fire-making techniques for wet conditions, and map and compass usage. We held a spring clean-up event with Stony Brook State Park on April 1st. A week later, FORCES teamed up with Geneseo's own Professor Apple to plant native trees in the Arboretum at Geneseo.

We began our semester with a recreational hike and introduction to FORCES for new members on 1/28. In early February, we were certified to survey for Hemlock Woolly Adelgid and Emerald Ash Borer. We conducted surveys for these invasive species at Letchworth State Park in mid-February and early March. Hemlock Woolly Adelgid has heavily invaded some parts of the park, but the Emerald Ash Borer was not found.

In mid-April, we held our biannual camping trip at Letchworth. The trip included a recreational hike to the lower falls and an invasive Vinca minor removal event. We teamed up with the Genesee Valley Conservancy to remove invasive Parsnips and plant various native trees. Our educational coordinator, Kyle Sanduski, gave a talk on the fluidity of the EPA on 4/26, after we held the elections for Fall 2017.

Our 3rd Annual Trainapalooza was held at Watkins Glen State Park May 31st - June 1st, with 29 stewards from 12 colleges. Communicating with park patrons, trail maintenance, HWA phenology and surveys, and an interpretive hike through the ancient gorge were topics included in the workshop.

"This position has given me excellent leadership skills and has given me insight on how things are accomplished on my campus." - Erica Mackey
Taconic Region Update
Steven DiFalco, Natural Resource Specialist

We’ve been off to a great start this summer, with lots of projects. We have two seasonal stewards this summer, John Zeiger and Brian Keating, and our high school intern Ian Konigsberg just left after 6 weeks of working with us. We are starting our vegetation monitoring for the summer, which includes surveying our miniature deer exclosures and deer browse monitoring plots, which help us identify how deer are affecting our forest. We are propagating native wildflowers for restoration along designated wildflower trails. As always, we’re prioritizing our invasive species removal and have a lot of work ahead of us, but have seen improvements from last year.

Featured Project
Patricia Shulenburg, GLRI Dune Restoration Project Coordinator

FORCES Stewards and volunteers are working hard to educate beachgoers to “share the shore” with piping plovers and promote stewardship of the dune ecosystem. If you are interested in volunteer opportunities or learning more about this project please contact Patricia Shulenburg, patricia.shulenburg@parks.ny.gov for more information. Thank you to the 2016 and 2017 piping plover and dune restoration stewardship crew for an incredible field season not only promoting the recovery of this species but protecting the dunes and wetlands system for both wildlife and recreational visitors for years to come.

Stewards Shaina Jonson and Alivia Sheffield are hard at work this summer collaborating with partners from SUNY ESF, Onondaga Audubon, Audubon New York, New York State Department of Environmental Conservation, U.S. Fish and Wildlife Service, and The Student Conservation Association to promote the recovery of the federally endangered Great Lakes piping plovers at Sandy Island Beach State Park. We are actively working to make habitat improvements by mapping and managing invasive species, transplanting native species, hosting educational workshops, providing erosion control of the dunes in addition to monitoring and protecting piping plovers.
The Environmental Field Team would like to thank our hard-working FORCES interns for supporting all of our projects. We couldn’t do it without you!

Ornithology Stewards

Martha VanBork, Ryan Felske, Austin Higgins, and Michelle Gianvecchio have teamed up with Alexis Vanwinkle (Supervising Conservation Steward) to expand bird surveys at Ganondagan. Stay tuned as Ganondagan edges closer to becoming the Finger Lakes Region’s first Bird Conservation Area!

Plant Materials Program Stewards

Erika Ester, Michaela Freeman, and Lindsey Ayers have been hard at work in the greenhouses at Sonnenberg Gardens & Mansion State Historic Park. Already, the greenhouse is full of plants going towards multiple projects at Ganondagan, and a Pollinator Meadow at Cayuga Lake State Park – thanks to the dedication of these stewards! We can’t do it all though – please reach out (EnvironmentalFieldTeam@parks.ny.gov) to get involved!

Environmental Conservation Steward

Charlie Ippolito is joining Kira Broz (Riparian Restoration Steward) this summer, starting up our newly awarded Riparian Corridors Grant (co-written with the Finger Lakes Institute, this Great Lakes Restoration Initiative Grant is funded by the US Forest Service). Charlie will be spending this summer surveying, planting, and removing invasive species along our waterways at Ganondagan.

Being an intern and FORCES volunteer in Allegany State Park brings both great opportunities as well as experiences. As an intern I was able to learn how to run public programming for park patrons, put on my own program, and have fun in the process. However, the learning opportunities didn’t stop there; I was also able to assist in various types of environmental stewardship practices such as water quality testing, invasive plant management, and map making to help expand my skill set.

My FORCES project for the winter months was the new interpretive tree trail that is on the Red House bike path. I was able to plan out what trees went on the trail, assist in mapping them, and condense all the information into a brochure. The trail features trees such as yellow birch, sugar maple, and tuliptree along with 28 other species. The majority of the trees incorporated into the tour are native to the region.
The ESF FORCES club has had a fairly busy year this past academic year. In September, ESF FORCES participated in Aquaday at Willow Bay in Onondaga Lake Park, an event hosted by the American Fisheries Society at ESF to educate the public about our aquatic resources. The club also held a weekend camping trip to Green Lakes State Park in September, which included collecting native seeds of things like milkweed and dogwood for winter storage and eventual planting in Ganondagan State Historic Site.

October saw some ESF FORCES members heading to the annual FORCES gathering at Chenango Valley State Park, participating in the Creek Freaks stream ecology and biological monitoring training workshop down in Morrisville, and around Halloween assisting at the Wicked Woods event at Green Lakes. The end of the fall semester featured a training on and assistance with a Hemlock Woolly Adelgid (HWA) survey at Clark Reservation in partnership with Cornell Cooperative Extension. The Spring semester saw those skills from the December training being put to use to conduct another HWA survey at Green Lakes State Park.

On campus activities in the spring included participation in the Winter Carnival at ESF, and running bird call trivia during Earth Week at ESF. Other highlights included helping with an education event for East Syracuse Minoa students, the FORCES leadership summit, and as always the end of the academic year was capped with some members volunteering at the Montezuma Audubon Center’s annual Wildlife Festival. Congratulations and best of luck to all of our graduating seniors and to our new officers. See you in the fall, or at the State Fair.

3rd Annual FORCES Trainapalooza at Watkins Glen State Park, May 31st - June 1st.

The FORCES mission is to engage New York State college students to simultaneously improve OPRHP resources and enrich student academic, recreational, and career opportunities.
