Danger Markers are typically placed where known water depths are less than 4 feet at distances greater than 100 feet from shore. Danger Markers or Regulatory Marks may be placed within 100 feet from shore when such placement is deemed necessary to public safety. Examples of obstructions, both natural and man-made, include sunken islands, rock piles, abandoned cribbing, wrecks, old piles or anything else below the water surface. Obstructions that may also warrant marking could include piers, docks and partially submerged islands that otherwise can not be readily detected by boaters while underway, especially if the obstruction lies in an area heavily used by boaters or within close proximity to a navigable channel.

**INSTRUCTIONS**

1. Please use this form for requests on the following bodies of water only:

   | Allegheny Reservoir | Keuka Lake |
   | Black Lake          | Lake Bonaparte |
   | Canadarago Lake     | Oneida Lake |
   | Canandaigua Lake    | Onondaga Lake |
   | Cayuga Lake         | Otsego Lake |
   | Chautauqua Lake     | Oswasco Lake |
   | Conesus Lake        | Rushford Lake |
   | Cuba Lake           | Sandy Pond |
   | Delta Lake          | Saratoga Lake |
   | Findley Lake        | Seneca Lake |
   | Higley Flow         | Silver Lake |
   | Irondequoit Bay     | Skaneateles Lake |

2. Attach one drawing or section of a chart showing the general location of the obstruction on the body of water. This drawing should show as much of the lake as possible along with geographic points of reference.

3. Attach a second drawing showing the specific area in which the hazard is located. Indicate position, distance from shore, distance from other objects in the vicinity, etc.

4. If possible, please provide a GPS position of the hazard in the space provided.

5. Please mail the completed package to the Bureau of Marine Services at the address provided above.
